

Alejandra Boscan, a General Internal Medicine Staff and Clinical Assistant Professor at the University of Calgary, holds a Medical Doctor degree from the Universidad del Zulia in Venezuela (2000) and completed her Internal Medicine Residency (2008-2011) and General Internal Medicine Fellowship (2011-2012) at the University of Calgary. She completed her training as a Simulation educator at the Center of Medical Simulation in Boston and is a Certified Healthcare Simulation Educator since 2017. She is also a diplomate of the American Board of Obesity Medicine as of 2023.

Dr. Boscan is involved in clinical practice and teaching at the University of Calgary, where she also serves as the site lead for the Internal Medicine Simulation Program at South Health Campus. Her work focuses on inpatient care, pre-operative assessments, and outpatient clinics, while she plays a key role in the training and education of medical students and residents. She has a special interest in Lifestyle Medicine and is a member of the American College of Lifestyle Medicine.

Outside of her clinical and academic activities, she is a wife and a mom. She enjoys dancing, hiking and riding her bike.
