

Dr. Daniel Moller completed his fellowship in General Internal Medicine with a focus on Perioperative Care at McMaster University and the University of British Columbia. He later joined the Division of General Internal Medicine at UBC in 2022. Within the division, Dr. Moller provides full spectrum perioperative care including both outpatient pre-operative medical optimization and acute inpatient care as part of a dedicated perioperative service. More recently, he developed an outpatient clinic that provides optimization before complex spine surgeries as well as post-operative care for complications including myocardial injury after non cardiac surgery and post-operative atrial fibrillation. Dr. Moller also practices full spectrum internal medicine and critical care in the community. He is passionate about teaching and is a clinical skills instructor, resident mentor, and a member of the GIM fellowship Competence Committee. In his spare time, you'll find him trail running on Vancouver's North shore.
